

Gamaliel Mendoza-Cuevas

PhD. in Neuroscience, Data Science enthusiast and quantitative researcher.

Profile

I am Gama

A PhD in Neuroscience who became passionate about the relationship between human and man-made brains, which led me to feel interested in Computer and Data Science.

As a researcher, I developed a solid basis in developing workflows that start by organization of databases, data-driven analysis and explainable results, with visualizations and reports demonstrating the link between all those processes.

My work

I have worked on development of algorithms that programatically range from search of datapoints to modelling signals, development of neuronal networks and fine-tuning use of GPTs.

The publication of several products resulting from the positions I have held, reflect the capability of both my work and my ideas to be developed and shared through

manuscripts at any level, included high-level stakeholders.

The near future

I try to work remotely as much as possible, as I have an independent work rhythm and routines that allow me to work in a structured fashion without necessarily attending a physical space.

What I do: (Engineering ↔ Analysis ↔ Science)

Expertise and certifications

Data Engineering (Databricks), Databases and SQL for Data Science (IBM)

Data warehousing (Hadoop, Databricks, Oracle, MySQL).

Deep Learning (NMA), Machine Learning Practitioner (Databricks), Machine Learning with Python (IBM)

ML Frameworks (PyTorch, TensorFlow, Sci-Kit, Transformers).

Data Analyst Associate (Databricks), Python for Data Science (IBM)

Programming languages (Python, Spark, SQL, R, MATLAB).

Version control

Git, GitHub, Bitbucket.

Research & development

Signal processing in Neuroscience, Data Science and Neuroscience, Machine Learning for healthcare.

Employment history

Cotiviti

Aug 2025 – Present | Remote, Mexico City, Mexico.

Data & Insight Analyst/Junior Data Scientist.

- Deployment of model serving endpoints for neural network classifiers for healthcare data.
- Development and monitoring of recommendation systems for healthcare.
- Development of recommendation systems for healthcare based on K-means clustering.
- Development of classifiers for healthcare data using convolutional neural networks (CNNs).

- Development of Byte-Pair Encoding (BPE) tokenizers for the analysis of healthcare data.
- Fine-tuning of Transformer-based language models for the analysis of healthcare data.
- Development of ETL pipelines for local and cloud deployment (Databricks).
- Implementation of data quality monitoring systems (mlflow).
- Generation of Bronze, Silver, and Gold datasets for data analysis.
- Development of Python-based applications using machine learning models for the analysis of healthcare data.

BIOINVERT

Jan 2017 – Jun 2017 | Mexico City, Mexico

Data Analyst.

Standardization and publication of Neuro- and physiological measurements.

- Analysis of CT scans for the quantification of bone density.
- Statistical analysis of Aging-related changes in bone density.
- Co-authored paper accepted at Veterinary radiology and ultrasound.

APREXBIO

Jan 2016 – Jan 2017 | Mexico City, Mexico

Research Intern.

Standardization and publication of Neurophysiological measurements.

- Analysis of visual evoked potentials in Rhesus monkeys.
- Certification on the use of MRI equipment for the acquisition of anatomical images.
- Book chapter of standardization of normal values for visual evoked potentials.
- Co-authored paper accepted at Experimental Gerontology.

Education 🖱️🔗📱

PhD

National Autonomous University of Mexico | Aug 2020 – Apr 2026 |

Queretaro, Mexico

Neuroscience.

PhD in Neuroscience under the Biomedical Sciences program. Basic research in animal models, Neuropathology, behavior and Neurophysiology.

- Published article accepted at Journal of Neurophysiology.
- Thesis: Enhancement of visual discrimination deficits in a of Parkinson's Disease by low dosages of L-DOPA.
- Advisor: PhD. Luis Alberto Carrillo Reid.
- Scholarship for PhD studies, Mexican Secretariat of Science, Humanities, Technology, and Innovation.

Master

National Autonomous University of Mexico | Aug 2018 – May 2020 |
Queretaro, Mexico

Neurobiology.

Behavioral assessment of visual discrimination in a model of Parkinson's Disease.

- GPA: 9.16/10.00, Honorific mention.
- Scholarship for Master's studies, Mexican Secretariat of Science, Humanities, Technology, and Innovation.

Languages

English

C1 (TOEFL iBT 110/120).

German

A2 (Ongoing studies; A1, Goethe-Zertifikat).

Spanish

Native.

Publications

Impaired visually guided behavior in a mouse model of Parkinson's disease

Mendoza-Cuevas, G., Perez-Becerra, J., Velazquez-Contreras, R., Calderon, V., Carrillo-Reid, L.

Journal of Neurophysiology, 2025 | DOI: [10.1152/jn.00307.2025](https://doi.org/10.1152/jn.00307.2025)

Visual evoked potentials in the Rhesus monkey

Mendoza-Cuevas, G., Hernández-Godínez, B., Ibáñez-Contreras, A.

Book chapter, 2017 | ISBN: 9781536110753

Computed tomography is a feasible method for quantifying bone density in Macaca mulatta

Solís-Chávez, S., Castillo-Rivera, M., Arteaga-Silva, M., Ibáñez-Contreras, A., Hernández-Godínez, B., Morón-Mendoza, A., Mendoza-Cuevas, G., Morales-Guadarrama, A., Sacristan-Rock, E.

Veterinary Radiology and Ultrasound, 2018 | DOI: [10.1111/vru.12624](https://doi.org/10.1111/vru.12624)

Electrical activity of sensory pathways in female and male geriatric Rhesus monkeys (Macaca mulatta), and its relation to oxidative stress

Ibáñez-Contreras, A., Hernández-Arciga, U., Poblano, A., Arteaga-Silva, M., Hernández-Godínez, B., Mendoza-Cuevas, G., Toledo-Pérez, R., Alarcón-Aguilar, A., González-Puertos, V., Konigsberg, M.

Experimental Gerontology, 2018 | DOI: [10.1016/j.exger.2017.11.003](https://doi.org/10.1016/j.exger.2017.11.003)

The effect of oxidative stress on brain electrical activity and its repercussions on sensory organization in geriatric Rhesus monkeys in captivity

Ibáñez-Contreras, A., Hernández-Godínez, B., Mendoza-Cuevas, G., Hernández-Arciga, U., Königsberg, M.

Book chapter, 2017 | ISBN: 9781536110753

Awards

Second place at the 9th state health research forum

Visual discrimination in a mouse model of Parkinson's Disease • Queretaro, Mexico • 2024

Third place at design contest for the Latin American Brain Initiative (LATBrain)

2021
